View of the flange face of the holder inlet
This shows the PTFE sleeve across the flange sealing face of the holder

Features

- Ideal for corrosive applications and reducing the effect of product build-up
- A good cost effective alternative to exotic materials
- PTFE sleeve on all wetted surfaces of the rupture disk holder inlet
- PTFE sleeve is available on the inlet only, and outlet can be Fluoropolymer Teflon Sintered (FS) coated
- The ZOOK PTFE sleeved holder utilizes a Teflon encapsulated Viton O-Ring as standard. The O-Ring seal prevents the process media getting into contact with the bite-ring, this prolongs the high performance of the holder
- PTFE sleeve is available for ZOOK flat seat series reverse acting and forward acting disk holders, in sizes from 1" (25 mm) through to 8" (200 mm) ASME Class 150
- The operating temperature range for the PTFE sleeve is -20°F to 450°F (-29°C to 232°C)
- The ZOOK design utilizes a mechanical lock to engage Teflon for a rigid assembly
- PTFE sleeves are not torque sensitive and follow standard holder torquing procedures
- Consult ZOOK for further application information
